OBJECTIVES
To explore advancements in food science and technology.
To understand the research and development activities at CFTRI.
To gain insights into innovation, quality control and food processing.
Learning today,
Leading tomorrow
An opportunity to learn, explore and be inspired by excellence in Food Technology.
Let's Discover,
Learn and Grow Together!

Department of Commerce and Management of Vidyavardhaka First Grade College organized an institutional visit to the Central Food Technological Research Institute - CFTRI, Mysore on 12/08/2026.

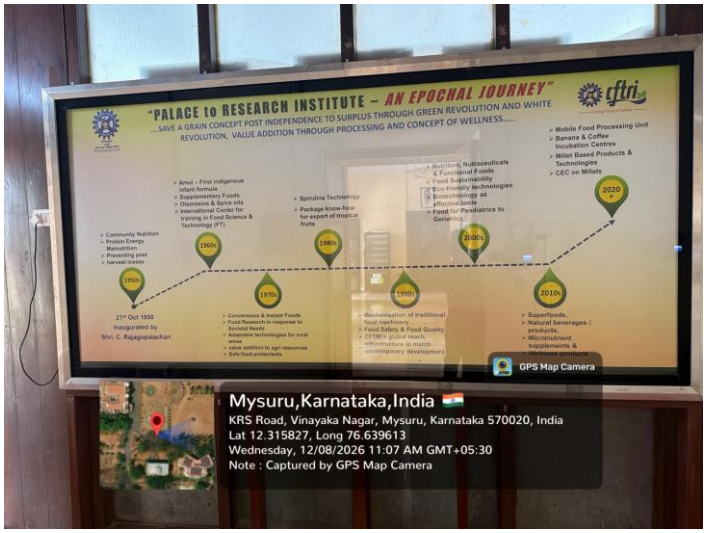

CFTRI is a premier national research institute under CSIR that focuses on food science, technology, and product development. The main objective of the visit was to provide practical exposure to 60 BBA students about how food processing, quality control, and research work in a real industry and research environment. Mrs. Geetha N, HOD, Department of Commerce and Management and Mr. Chandan V accompanied the students during the visit. During the visit, the students were guided by three experts from CFTRI. Mr. Suhas, Senior Scientist, explained in detail about the history, departments, and role of CFTRI in supporting food industries and entrepreneurs. *Mr. Puneeth, Engineer conducted a practical demonstration in the pilot plant and product development labs and explained the step-by-step process of bakery, dairy, and fruit & vegetable processing along with modern packaging techniques. Mr. Ragavendra, Engineer spoke about technology transfer, IPR, and consultancy services, and how management graduates can build careers in the food business sector. The experts also informed that CFTRI offers free internships and project opportunities for students, which was a major highlight of the visit. The most valuable part of the visit was the hands-on practical explanation where students observed live processing of food products, machinery used in production, and quality testing procedures followed in the laboratories. The experts clarified doubts and explained how hygiene, FSSAI standards, and HACCP are maintained in food industries. Mrs. Geetha N and Mr. Chandan V also interacted with the resource persons and encouraged students to ask questions, which helped students understand the direct link between classroom concepts and industry practices. All 60 BBA students from Vidyavardhaka First Grade College were greatly benefited from the visit as they gained knowledge about food product innovation, packaging, marketing, and entrepreneurship opportunities in the food sector. The session motivated many students to consider startups in food processing and also helped them understand career options available for BBA graduates in operations, supply chain, marketing, and business development within food industries.
